Congratulations! You have officially decided to start your journey to become a licensed CPA. Getting started is often the hardest part. Passing the four sections of the CPA exam is the biggest step in obtaining a license. We're ready to check through all four sections of the CPA exam so you can remove this big task item from the list. Here's how to get started with your Becker CPA course review starting with your Becker CPA login. Becker Login: Access made easy your Becker CPA login available at any time cpa.becker.com. You can bookmark this page moving forward for a quick and easy Becker online login. 2. Tap the user icon at the top of the page to access the MyAccount page and view your orders. Visit our planning portal to customize your Live, LiveOnline or cohort courses. You may have to use your Becker CPA login. Download the app from the app store and use the Data to log in to Becker to unlock all CPA review content on the go. Now you are ready to learn on the big exam day anywhere you go! Explore your training time schedule in a way that best fits your schedule with our useful study planner. Set up a planner based on what order you plan to take in each section of the exam. Not sure which section to take first? The best CPA exam may depend on your specific CPA journey. And don't forget the importance of time management. Learning on CPA Exam isn't the only task on your to-do list, so creating an effective learning planner based on how much time you can actually devote each week can help you manage your academic time with your work and personal life. How to get your physical tutorial your Becker CPA review course includes printed and annotated digital tutorials. If you are best placed to learn with physical tutorials, you can request that your Becker tutorials be sent. Your textbooks will not be delivered until you request them. This is done in order to make sure that you get the latest training materials as you study for each part of the CPA exam. Follow these simple steps to release your physical materials: Log up the course portal on online.becker.com Click on My Account in the bottom left corner. Click on the delivery delay menu and select the physical materials for the CPA Exam section you're currently studying. The best practice is to release books for each section individually as you study for them how we update the materials throughout the year. Click the Redeem button for the CPA Exam section for which you want physical materials, complete your delivery address and click on the Ship button at that address. Materials ship using the method chosen at the initial registration. The additional costs do not apply. Allow 3-6 business days to process and deliver. For more help or problems with the release of your physical tutorials, please call our customer service team at 877-272-3926. Installing The Final Review of Becker's Final Review is a concise review that reinforces understanding the most complex concepts on the CPA exam. It offers brand new lectures, multiple-choice questions and simulations. This is a great resource in the last days of your CPA training schedule. The Becker Final Review course is available for Becker Premium and Pro students and can be downloaded to allow you to study offline at any time. To do this, simply go to the download section on the portal home screen and select the Final Review option for the operating system. Once downloaded, you can access the CPA Final Review at any time, even without internet access. If you are a Becker Advantage student, you can purchase the Becker Final Review course by section or in full as a package of 4. The CPA Exam Preparation mobile app requires a significant investment of time and energy. Realistically, you won't be able to spend all this time in a library or traditional work environment. Do you need to learn on the go? Of course you do! Your Becker CPA review course is available on your mobile phone, allowing you to learn without a desktop computer. Simply download the app and enter the Becker CPA login credentials to get started. Available for Apple® and Android™ tablets and smartphones, Becker's CPA Exam Review mobile app makes it easy for you to learn on the CPA exam where and when you have a few minutes of downtime. Your progress will automatically sync between your computer and mobile digital devices, so you can always pick up right where you left off. Apple® is a registered trademark of Apple Inc. Android™ is a trademark of Google Inc. Apple Inc. and Google Inc. does not sponsor or endorse Becker in any way. it's somewhere on Reddit, whoops. Found this through a simple Google search because I wanted someone to compress notes (except my own). I'm about 40 pages long, just a review of everything I've learned in Becker. Not sure if it's a waste of time to read, but it's only good to review all the concepts (because there are many) and figured I'd like to share it in case someone doesn't want to look at Becker's tutorials anymore. It should not take more than a few hours to go through all the thing exam on Thursday, praying for me y'allPage 2 28 comments dYour choice of CPA exam training materials is a key determinant of your success. Since there are dozens of vendors, we have created a step-by-step action plan to help you find the right CPA exam training materials for your training style and budget. How to choose a CPA course your CPA course is the second most important factor determining your success. There are a few things to consider when choosing a CPA course. What is your training style? Your schedule? What is your budget? Answer these questions to find the best CPA Study materials for you. Learning Style Do you know your prevailing style of learning? Some CPA is best in class settings where they can get feedback from instructors and peers. Other Others are visual learners and learn more effectively with video lectures. Some students learn better through text and reading. If you can define your learning style, you'll be more accurate in choosing the best CPA Study materials for you. Each CPA course offers many different learning formats. Most offer online programs, some offer live classes, all offer textbooks and independent training courses. When you look at your graph, you'll know better what will work. For those who have a job, live classes may not fit into their schedule. For those who are not very disciplined, self-taking courses may not be the best option. The budget of each CPA course is dramatically different in price. Some are much more expensive than others. Becker is one of the more expensive programs, but many previous CPA candidates say it's worth it. Wiley is less expensive, and most CPA students praise the software yet find tutorials to mislead. Look at each program and read other users' reviews on each one. There are three main types of cpa exam training materials: 1. CPA Review course This is the most expensive part of your CPA exam training materials. You may be shocked to know that some courses cost over \$3,000! You can refer to our comparison of different CPA review providers to help you breakdown their offers. 2. CPA Summary Notes CPA review material thousands of pages of information that no one can fully learn or remember. Subsequently, most students prefer to use summary notes in the last month of study. This is no different from using summary notes before a college exam. For a CPA exam, students typically use 100 pages of notes that only emphasize the most important concepts. Summary notes are not useful for learning concepts because resumes are not sufficiently detailed. Rather, summary notes are used to reinforce key concepts from your CPA learning materials. 3. CPA Practice Exams Most students practice with 500-1000 questions for each individual section (BEC, FAR, REG, AUD). Take a diagnostic test to get an idea of your baseline score. Practice matters every day in the last month of training. In the last week of training, take another diagnostic test and check the improvements. You can start with an AICPA sample test. CPA Review Courses Most CPA candidates want the most effective, reliable and budget program. Here's a breakdown of what you'll find in the best CPA research materials. Each CPA candidate has their own training style, and most institutions offer different formats to fit their individual needs there are dozens of different CPA exam companies that specialize in optimizing your learning time and you take (and pass) the CPA exam. Some of the best-known companies include Becker, Yeager, Gleim, and Roger CPA. Video lectures Some of the commonly used CPA review courses include online videos that you watch in your time. The video is mostly lectured by reputable instructors. It's This. option for those who love cool lecture settings and want to watch the video on their own graphics. Live Courses Live courses are offered online or in a physical location in many cities across the US. It is popular for students who learn best in class setting and rely on instructor and fellow feedback. This is a very interactive way of learning for a CPA exam if your schedule allows. If you tend to be distracted easily live the course is the way to go. Self Study Self Study Programs are the most popular type of product CPA Review. These programs are adaptable and flexible. Most candidates work full-time and do not have the luxury of studying 40 hours a week. Self-learning programs allow a candidate to study on an individual schedule. Many companies offer a hotline, or a chat help option. Self-study usually includes textbooks, flash cards, lectures and other useful learning tools. CPA Books Even if you don't buy a full CPA review course you can often buy CPA research material as a standalone product. There are various CPA books out there for CPA candidates to choose from. CPA Books vary greatly in terms of content and writing style. Each of the CPA books has its ups and downs. Some people learn better with really technical books (usually very detail oriented people) while others find them confusing and difficult to pass. Below is a brief overview of some of the CPA Books out there, and what their strengths and weaknesses are: Becker CPA Books Becker CPA is a well-washed company with materials approved by the Big 4. They claim to have a double pass rate of any other study program. However, like most things in life, you get what you pay for. This is the most expensive program out there yet CPA candidates believe the price tag is worth it. Becker also offers more than just CPA books. They offer live courses, self-study programs and more. If money isn't an option, or it's worth it, you'll definitely check out Becker CPA. Our CPA students say: Becker's CPA review books are the gold standard. Cpa training material is user-friendly and since large accounting firms use Becker, I am sure the material is updated and top-notch. Wiley Wiley books are updated every year. This is one of the least expensive options as far as CPA materials go. They also have an online test bank that includes 3-4000 exam practice questions. The test pot is in a format similar to the prometric exam. Some CPA candidates complain that Wiley books are hard to read and difficult to pass on your own. Many CPA candidates choose Wiley only for practical questions. What our CPA candidates say: Wiley books are the cheapest of CPA review books out there, and practice exams and practical issues are very However, Wiley's CPA review books are too technical and the book is overwhelming and difficult to pass on your own. There are other great options for CPA books out there. Yeager, Roger, Glim, and many many Check each one to see which program will work best with your schedule, training style and your budget. Yeager CPA Review Books Yeager claims to have an 88% pass rate. They are renowned for their excellent instructors and customer service. Yeager offers a hotline if you have questions. It's much cheaper than big competitors such as Becker, but it's much more comprehensive than Wiley. CPA Students Say: Yeager's CPA review books come in the form of a home-schooling program. The modules can be misleading, and it's not that convenient. It's a great middle ground between Becker and Wylie. Jaeger has more information than Wylie. Unfortunately, the lectures are a bit random and maybe even a little unprofessional. I like the fact that Yeager is a family business means that customer service is top notch. Yeager is a great option, especially for the money invested. CPA Summary notes the next most important type of CPA Training materials are brief notes. After you work with the CPA Course Review you will have about 1400 pages of information that you took in as your Prometric exam date is approaching you will want to use focus notes and study from a 100 page note. Additional research guides often take notes from previous CPA candidates that can give you tips, tips, tutorials, research schedules, trackers, flash cards, etc. The main CPA study guide is only \$47 and the materials are updated for free. CPA Review is free - they used to offer a lot of CPA review stuff for free (hence the title). However, now it's basically just a review of other CPA Review providers for another 71 - Ninja training stuff is now subscription-based at \$67 a month. It can get quite pricey as it is auto updated every month. You know how gym membership works when you're not using it. They have some neat instruments such as voice recorded sound for people who want to listen to resume notes on their phone or MP3. CPA Practice Issues Once you have chosen the correct course of CPA Review and the right CPA summary notes that you will most likely want to practice some CPA questions before the exam. Most students use at least 500 MC's practice up to the actual exam date. You will definitely want to add some CPA exam questions to your arsenal of CPA training material. You can also find some practical exams on the AICPA website. However, testicular samples will only have an MC's sample. CPA Modeling Issues Since most of the SIM exam you can also practice with SIM machines. It's important to get used to formatting and layouts. Topics are hard to explore as there is an infinite number of topics that you might be On. Any of the cpa review providers mentioned above will also offer some SIM practice issues. Concluding a selection of the best CPA Study materials is not a daunting task if you ask yourself the right questions. You need to know your training style, budget and work schedule before down \$3,000 on the cpa course review. After the course, supplement your CPA training material with brief notes and some practical questions. Questions. becker cpa study material free download pdf 2019
